

TAPS Data Overview

IR provided data from AY 2013-2018

This report presents summary data for the 2012/13 – 2016/17

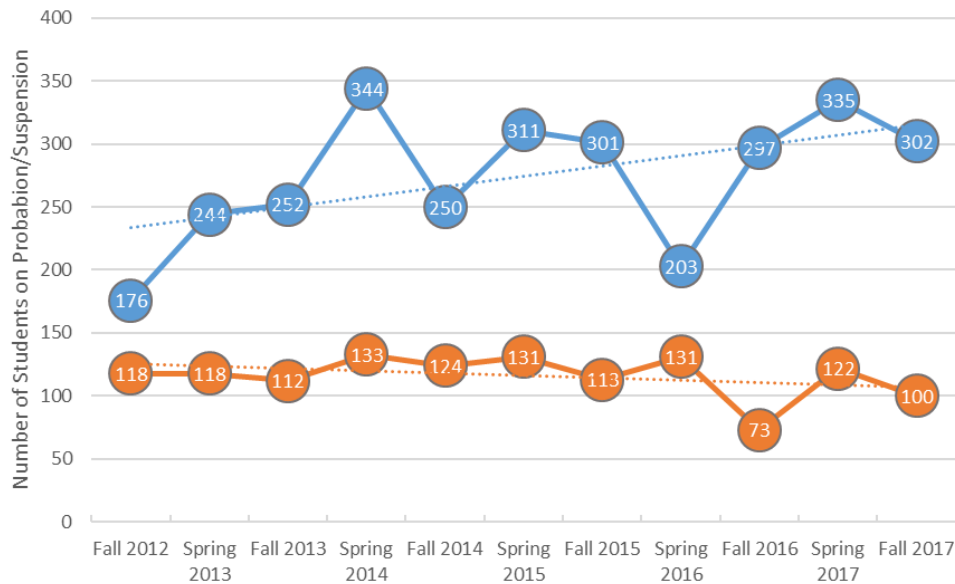

years

- Academic Career
- Academic Level
- RAI
- Graduation Date
- Re-enrollment date
- FASFA
- EFC
- Admit type
- Academic load
- HS GPA
- ACT Composite
- Residency
- U-Bill hold
- Marital Status
- Pell Eligible
- Primary College
- Minority/Non-Minority
- Legal sex
- Primary major

The Big Picture

Number of Students on Probation/Suspension, 2012-2017

Semesters to Re-Enrollment, AY2013-2017

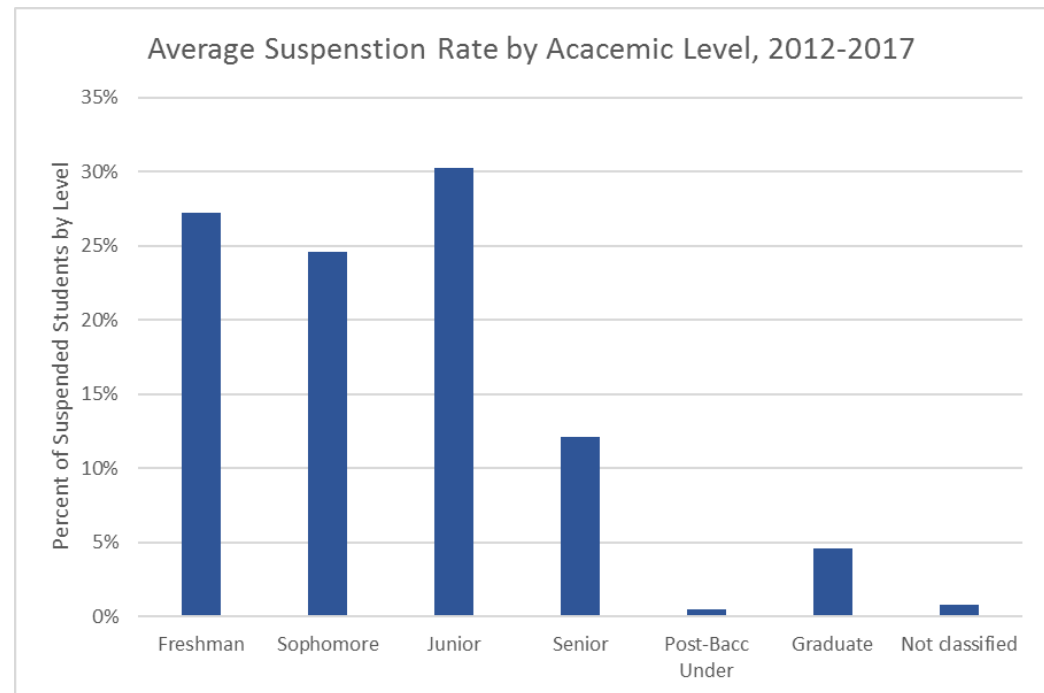

Probation is up - suspensions are flat

However, most suspended students never return to UNI

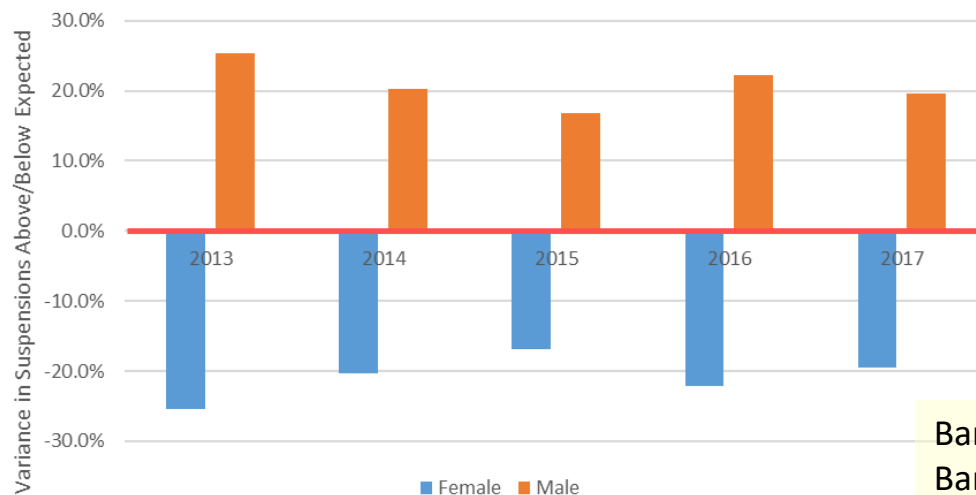

- Suspensions are acting as a deterrent and not as a mechanism to improve
- Where do they go?
- How many are turned down by CARR in 1st, 2nd semester of suspension?

Who Gets Suspended

Freshman-Juniors get suspended. The Junior bump is related to transfers.

Variance in Suspension Rates by Legal Sex Relative to Proportion of Population, 2012-2017

Males are 40% more likely to be suspended than females

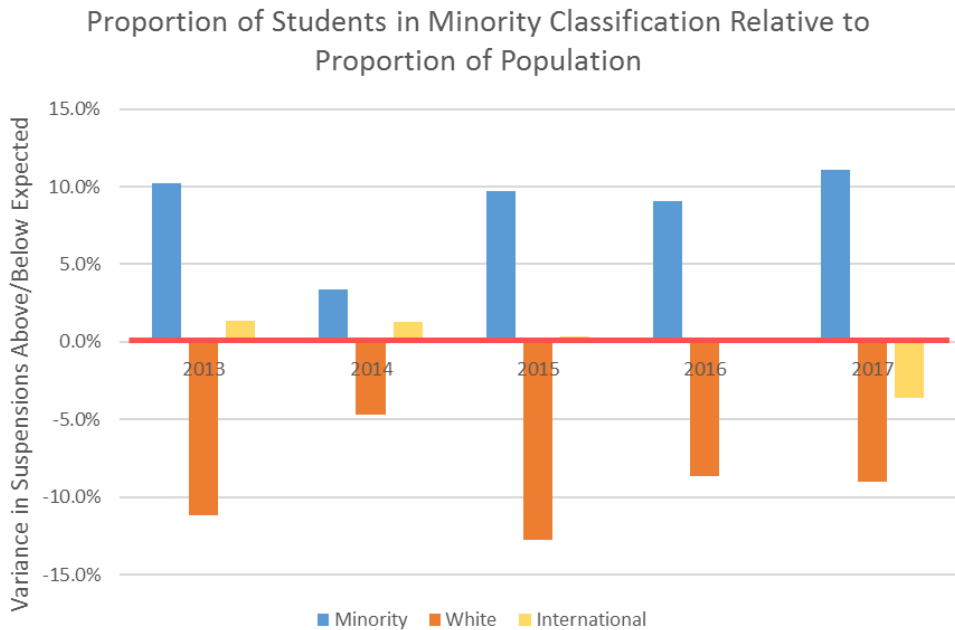

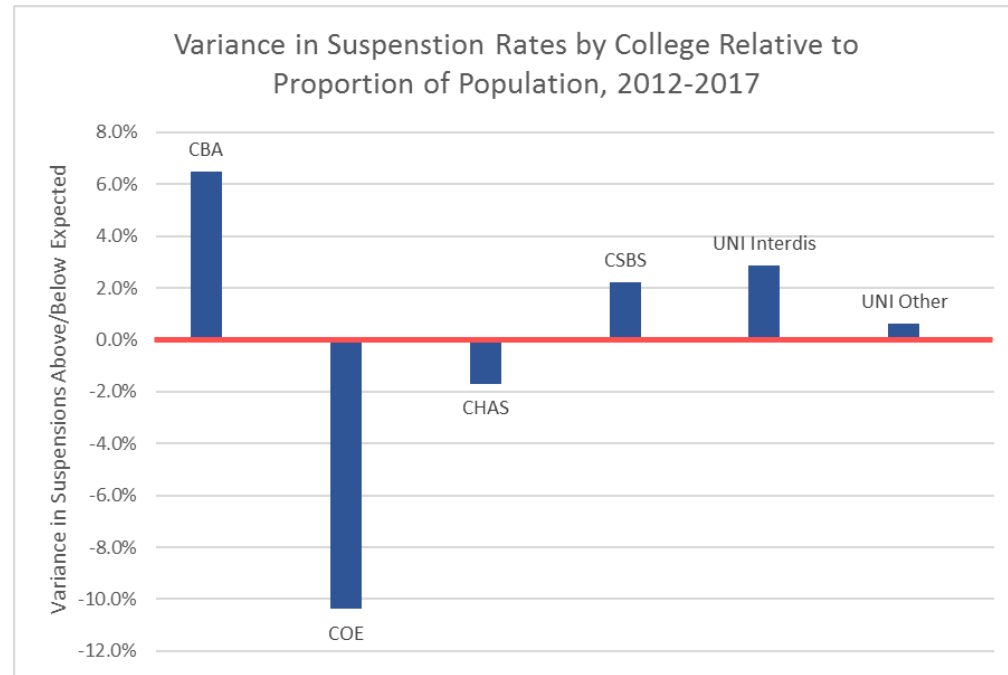

- Males make up 41.3% of student population, but 62.2% of suspensions
- There were, on average, 2.3 times as many males suspended during the study period

Bars above 0 mean the population is overrepresented
Bars below 0 mean the population is underrepresented

Who Gets Suspended

There are differences by college, although the absolute numbers are not that large. CBA has the highest proportion of suspensions, COE the lowest

CBA	56
COE	30
CHAS	73
CSBS	44
Interdisc	10
Other	23

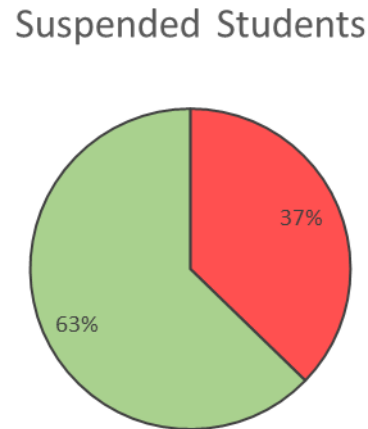

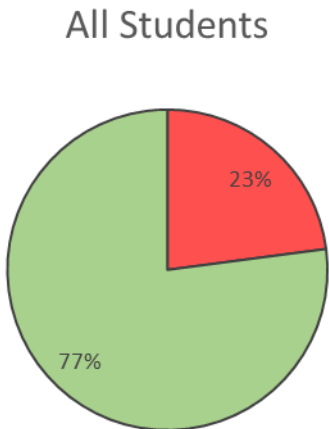

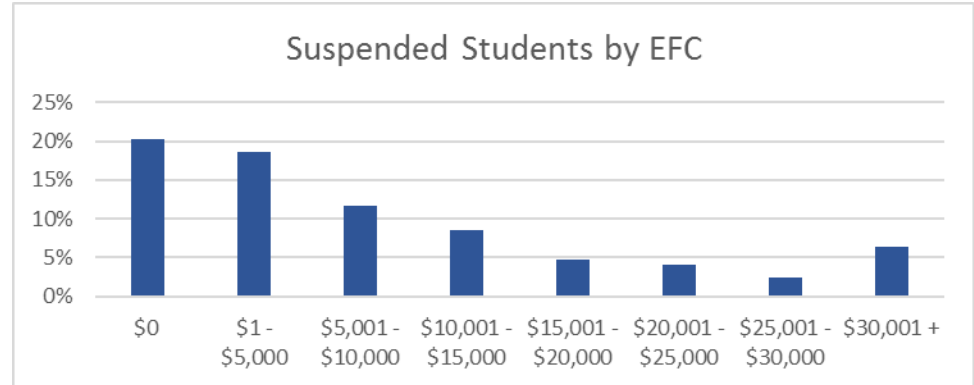

Minority students are more likely to be suspended than white students

- Minority students made up 8.8% of students but 17.5% of suspensions

Financial Connection to Suspension

There are significant differences in suspension rates based on proxy measures of financial security

- EFC below \$5000 are 4 times more likely to be suspended than top 4 brackets
 - *spike in >\$30k is an artifact of combining classes*
- Pell-Eligible students are suspended at a 14% higher rate
- 3 times as many suspended students have U-Bill holds

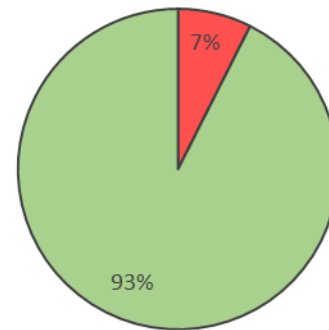

■ Pell Eligible ■ Not eligible

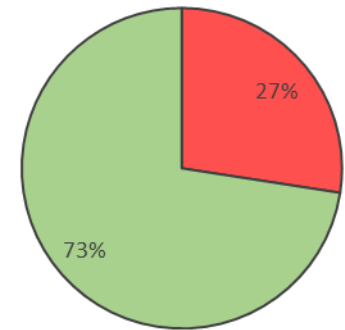

■ Pell Eligible ■ Not eligible

All Students

Suspended Students

■ Has U-Bill Hold ■ No Hold

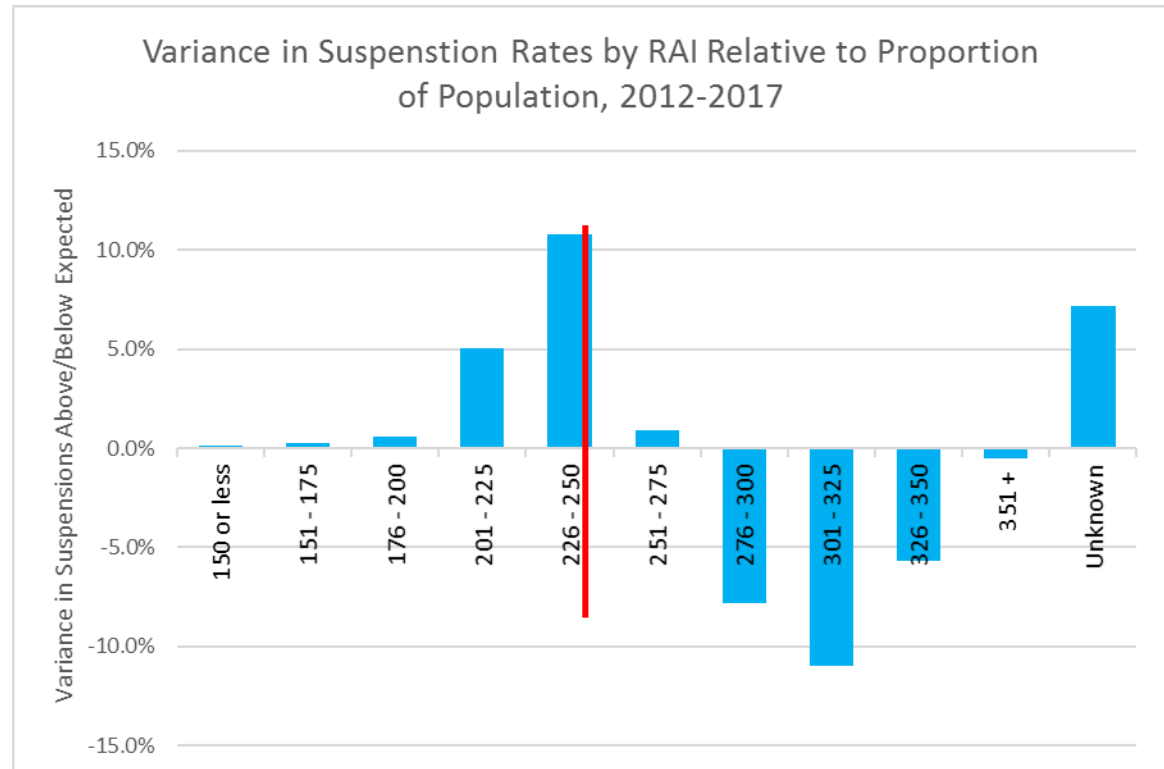

■ Has U-Bill Hold ■ No Hold

High School Performance and Suspension

There is only minor correlation with RAI scores

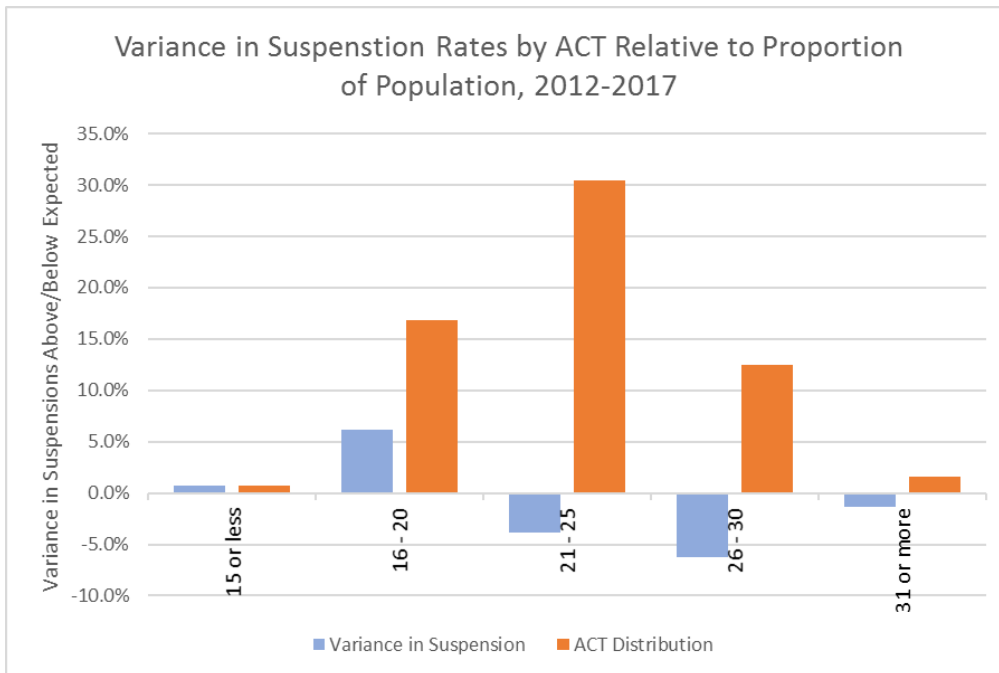

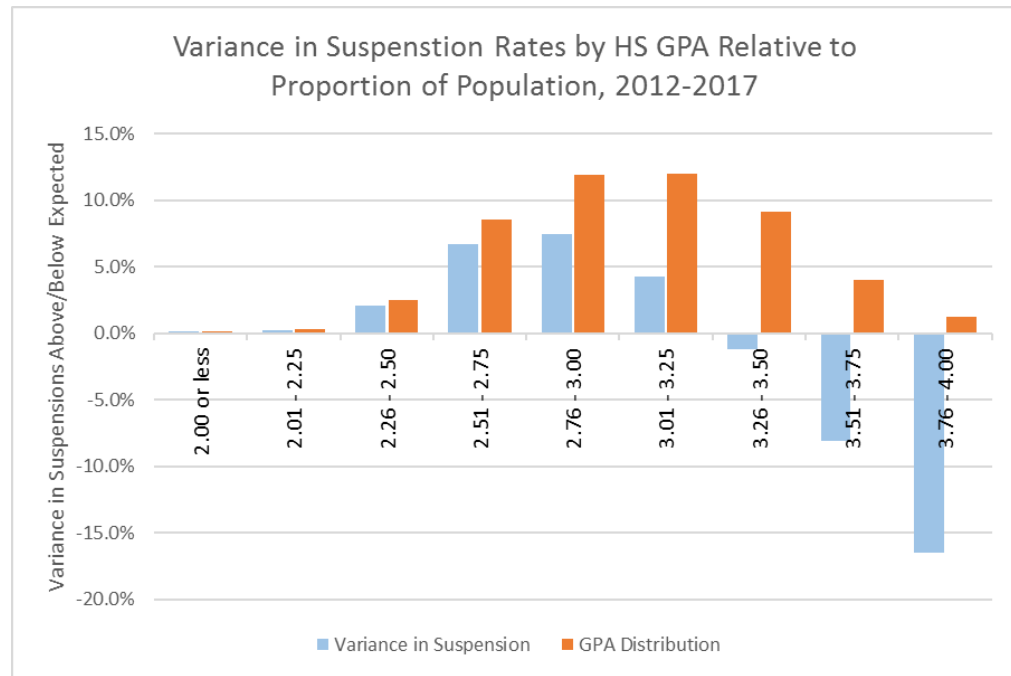

- $RAI = (3 \times ACT) + (30 \times GPA) + (5 \times \text{Years of Core Courses})$
- 245 = automatic admission

Some indication that conditional admits are more likely to be suspended, but need different breakdowns

High School Performance and Suspension

There is a slightly inverse rate of suspension relative to low/high GPA, but strongest for highest GPA

There is a slightly higher suspension rate for 16-20 ACT, but scores do not correlate otherwise
